

# DC FORM

## THE FRIENDLY CONCRETE FORM

The DC FORM system utilizes reusable injected plastic panels to realize formwork to build concrete slabs and walls fast and accurately.

The formwork process designed and developed by DC INTERNATIONAL is modular and consists of several components of varied sizes, making it possible to set up concrete buildings from one to four stories of almost any dimensions.

*Worldwide patents pending*

### APPLICATIONS

By using the DC FORM, it is now possible to assemble the reusable forms to construct good quality, low-cost buildings.

- Concrete walls for:  
houses  
foundations  
small buildings
- Concrete slabs
- Concrete roofs
- Swimming pools
- Retaining walls

### TECHNICAL SPECIFICATIONS

- Panels of different formats and textures, 24" x 24" (60 x 60 cm), flat or in relief, and interchangeable
- Injected components: panel junctions, spacers 4" (10 cm), 8" (20 cm), 12" (30 cm)
- Extruded components: corner profiles, adjustment profiles
- Metallic components: corner profiles, adjustment profiles

# DC FORM ADVANTAGES

- ✓ Interchangeable panels to make slabs and formworks of varied dimensions and patterns
- ✓ Forms are reusable many times over
- ✓ Maintenance free
- ✓ Low transportation expenses (components are light, stackable and not voluminous)
- ✓ Transportable manually (no lifting equipment is necessary)
- ✓ Easy installation (for assembly by unskilled labor)
- ✓ Suitable for self-construction projects
- ✓ Competitive price compared with conventional systems
- ✓ Affordable purchase cost
- ✓ Low use cost due to multiple re-uses
- ✓ Possibility of financing

## TECHNICAL SUPPORT

- 👉 Online support
- 👉 Installation guide in English, French, and Spanish
- 👉 Technicians available to provide support on construction site
- 👉 Five-year warranty against manufacturing faults

The DC FORM technology meets the standards of the building industry especially those regarding the safety of workers that handle and install the different components.
